------------------	-------------------	---------------------------	---------------------	-------------------------

PROFILE

Full-stack engineer with 12 years of experience, the last 8 on the core team behind **edbot.ai**, an AI learning platform that has delivered **32M+ lessons** to **100K+ peak monthly users** in 10+ countries. I set up the team's CI/CD and testing from scratch, took two AI content tools to production, and spend a lot of my time helping junior engineers get better at the craft. On the side I build and ship my own apps, **four live now across macOS, iOS, and Android**, with native code, payments, and subscriptions behind them. I like building things that survive real users, not demos that work once.

EXPERIENCE

Solve Education!

Senior Software Engineer

Indonesia (Remote) · Cross-functional team, 10+ countries

Jun 2018 – Present

- Core engineer on **edbot.ai** (32M+ lessons, 100K+ peak monthly users, 10+ countries). **Owned the frontend architecture**: framework choice, folder structure, and the core systems (state management, analytics, localization) behind the Learning, Profile, Mission, Store, and Settings features.
- Set up the team's first **CI/CD pipeline and Selenium E2E suite**, replacing manual deploys. Broken releases that used to need rollbacks mostly went away, and nobody had to babysit deploys by hand anymore.
- Built **DCS (Dynamic Content System)** on my own, an AI content generator I took from idea to production.
- Built **Content+** with one other engineer, an LLM-assisted drafting tool with real-time collaboration for the marketing team.
- Shipped 10+ internal products along the way: Learnalytics, Localizy, Dawn of Civilization, edbot.ai v2.
- Mentored **3 to 5 interns** and worked closely with junior engineers on delivery habits, code review, and how they approach their work day to day.

Xtremax

Backend Developer · Singapore & Indonesia

2016 – 2018

- Maintained 3 live client projects across cross-border SG/ID teams; certified CRM Sitefinity, MVC .NET + JavaScript

Elephant Talk (Pareteum)

Software Developer · Spain & Indonesia

2015 – 2017

- Built **C#** microservices and 2 Angular JS + **C#** web apps end-to-end with integration and unit test coverage

PT. Suzuki Indomobil Motor

.NET Developer · Indonesia

2014 – 2015

- Built a Dealer Management System deployed to all main branch offices nationwide

SOLO PRODUCTS, LIVE IN PRODUCTION

- Vacua

LIVE

SwiftUI · AppKit · macOS · Paid (\$12, no subscription)

A native macOS junk cleaner. Nine scan categories, safety labels on every item, clears caches, duplicates, and privacy leaks. One-time price, no ads.
- Qadha

LIVE

React Native · Expo · Supabase · TypeScript · Firebase

An Islamic prayer-consistency app. A 30-day guided journey, prayer tracker, reflection prompts, and an audio library. Live on Google Play.
- Plareon: Daily Hoops

LIVE

React Native · Expo · Supabase · TypeScript · Firebase

A basketball training app. Daily plans, guided drills with audio, XP and streak tracking, achievements, and an Elite subscription tier.
- Zokuu

LIVE

React Native · Expo · Native Kotlin module · Zustand

An offline-first Android alarm app with spoken (TTS) and custom-sound alarms. I wrote a native Kotlin module so background alarms fire reliably. No account, no network, no ads.
