Fery Yundara Putera

Senior Software Engineer: system design and AI-assisted delivery

Indonesia, remote (UTC+7) / feryyp.work@gmail.com / linkedin.com/in/feryyp / github.com/daefery / daefery.github.io

Profile

I design applications and AI workflows, with AI-assisted planning, implementation and review. Twelve years in software, including eight in a fully remote team across 10+ countries. My work spans application architecture and the delivery processes that turn a design into working software.

Experience

Solve Education! · Senior Software Engineer 2018 to now

AI automation platform, 2026

- Led the platform from 0 to 7 live tools in one quarter.
- Designed and shipped a marketing content workflow on AWS Bedrock (Claude) in 2 months, with human approval required before publishing.
- Built the team's AI coding-agent setup: shared rules, required checks and delivery commands.

edbot.ai, AI learning platform, 2018 to 2026

- Owned the frontend architecture of a platform that delivered 32M+ lessons to 100K+ peak monthly users in 10+ countries.
- Introduced the team's first CI/CD pipeline and end-to-end test suite, replacing manual deploys.
- Took an AI content generator from idea to production as its sole developer. Shipped 10+ internal products, mentored interns, and was an engineer on the 2026 rebuild.

Xtremax · Backend Developer 2016 to 2018

Client platforms for Singapore and Indonesian teams, .NET

Elephant Talk · Software Developer 2015 to 2017

C# microservices and web apps for a telecom platform, Spain and Indonesia

Suzuki Indomobil Motor · .NET Developer 2014 to 2015

Dealer management system used in every main branch office nationwide

Personal projects

Brodev Agent orchestration

Coding-agent orchestrator. Isolated git worktrees; a task closes only when checks pass.

mnem Open source · Rust · SQLite

Local-first memory for coding agents, built from the transcripts they already write.

Lariksa Open source · Rust · Tauri

Offline meeting notes for Windows. Every action item cites its transcript line.

Four apps, built and shipped solo macOS · iOS · Android

Vacua, Qadha, Plareon, Zokuu: a paid Mac app, donation and subscription apps, an alarm.

Selected research

Per-Outcome Baseline Normalization Makes Proper Forecast Scores Improper

Fery Yundara Putera and Bramantya Farid Prakoso.

Accepted poster, Agenthon 2026 workshop at NeurIPS 2026 (non-archival).

Skills

Design	System design, application architecture, workflow design, ADRs
AI delivery	Agent orchestration, tool calling, MCP, memory, RAG, evals
Platform	AWS Bedrock, Docker, CI/CD, PostgreSQL, Supabase, React, Node.js, Django
Languages	TypeScript, Python, Rust, Go, C#, SQL

Education

B.S. Information Systems · Bina Nusantara University 2017

Diploma, Computer Engineering · Telkom University 2013
