PROFILE

Senior Software Engineer with 12 years building full-stack systems across EdTech, enterprise, and SaaS — from Suzuki dealerships to an AI-powered learning platform reaching 32M+ lessons in 10+ countries. Deep expertise in React, Next.js, Node.js, Django, Laravel, and CI/CD pipelines. Currently fluent in AI-agentic development workflows. Published Android developer (Lampalampa Indonesia). Five companies, five countries, one consistent focus: systems that scale and teams that ship.

EXPERIENCE

**Solve Education!**  
**Senior Software Engineer (Lead Frontend → Senior Fullstack)**  
Indonesia  

- Core developer of edbot.ai — AI-powered free learning platform, cross-functional team delivery across 10+ countries
- Reduced deployment failures via CI/CD pipelines and automated E2E testing (Selenium)
- Led fullstack evolution from React/Next.js frontend to AI-agentic development workflows
- Built 10+ internal tools: Learnalytics, Content+, Localizy, Dawn of Civilization, Solve Employment
- Stack: React · Next.js · Django · Laravel · Node.js · TypeScript · CI/CD · Selenium · WordPress

32M+ Lessons

100K+ Peak MAU

10+ Products

10+ Countries

Jun 2018 – Present
